## Diemix<sup>®</sup>, Dieswitch<sup>®</sup> and Dies

Extrufood excels in the manufacturing of dies for the confectionery industry. Well known are the dies for belts, spaghetti strands, ropes and cables for single or multi-colored extruded products which can be either solid, hollow or filled.

Extrufood was the first to offer multi-color confectionery production lines with the introduction of the Diemix<sup>®</sup>. The Diemix<sup>®</sup> enables the production of licorice or fruit gum with up to 6 different colors simultaneously while using only one extruder.

So this means that up to 6 different single colored products can be produced simultaneously, or products with up to 6 colors each can be produced.

Not only can we make multi-color and multi-flavor licorice, also the filling of co-extruded products can be colored and flavored.

We have a wide and well known expertise in dies, rotary dies, multi-color dies and co-extrusion dies. Please contact us for sample sheets to give you an indication of the possibilities we can offer.

**From Diemix<sup>®</sup> to Dieswitch<sup>®</sup>, your switch to a new look!**

Not only 6 different colors simultaneously in strands next to each other, but also switching colors within each strand during the extrusion is possible. This will give the industry a new boost, as new combinations can be made, more products can be made on one line, so greater flexibility and a higher efficiency are achieved!

Another option with the Dieswitch<sup>®</sup> can be to produce various shapes.

The Extrufood Dieswitch<sup>®</sup> can be mounted on an existing Extrufood Diemix<sup>®</sup>. Using only Diemix<sup>®</sup> 2 for 2 colors, a Dieswitch<sup>®</sup> will make your product look like a combination of multiple colors.

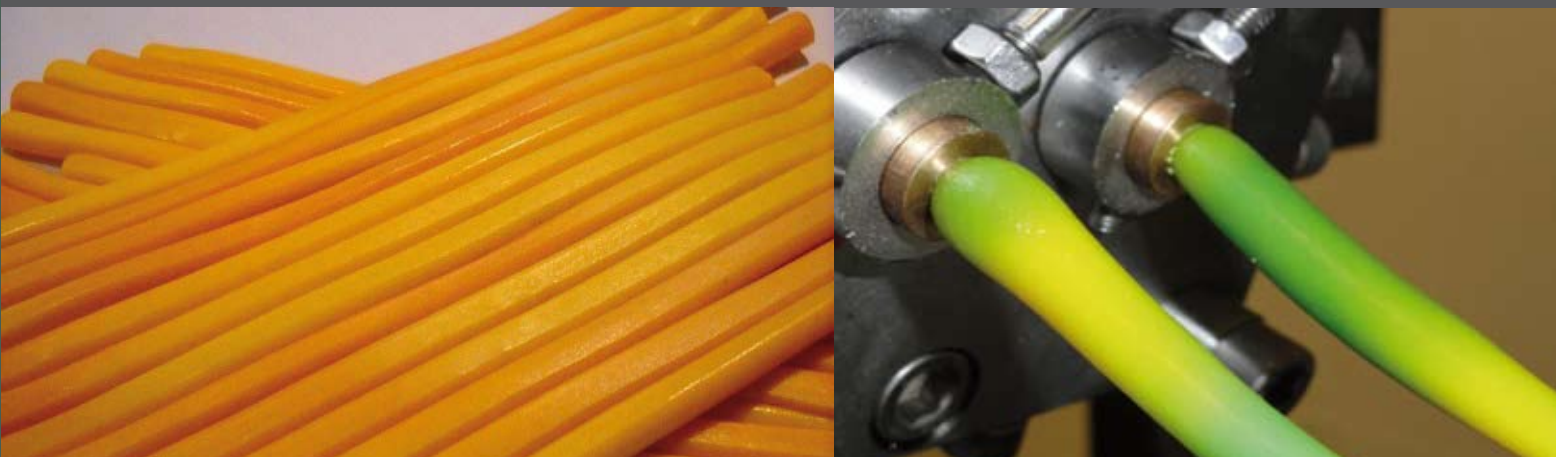

Natural color combinations like sunset, sunrise and natural ripening of fruit can be simulated quite easily.

Together, all these features make the Extrufood Dieswitch<sup>®</sup> a unique expansion for your existing extrusion line for a minimum investment and requiring a minimum amount of extra space.

If you would like to know more, please visit our website: [www.extrugroup.com](http://www.extrugroup.com) or contact us: [sales@extrugroup.com](mailto:sales@extrugroup.com)

The Diemix<sup>®</sup> and the unique Dieswitch<sup>®</sup> open new possibilities in product ranges with new looks!!
